

## Welcome to WP CONSULT Singapore

WP CONSULT Singapore Private Limited (WPCSPL) is a Singapore based professional consultancy firm that provides project management and project development services within the wind power industry.

Through our experience in planning of both onshore and offshore renewable energy projects, we provide high quality consultancy services at competitive prices.

We look forward to being of service to you in your new wind farm development or ongoing wind farm business worldwide.

## About WP CONSULT Singapore

WP CONSULT Singapore was founded in 2012 by Lars Vissing to provide price competitive and project management services to the wind power industry.

WPCSPL delivers services and solutions to all kind of wind power projects.

We focus primary on project management services, however we can also assist in project development services as well.

New-build wind energy projects invariably involve a peak in resource, with which WPCSPL can assist.

We can assist bringing in additional resources to your project staff, to cope with peaks in wind farm resource requirements, and to a marked competitive price.

## Our Mission:

With our central location in Singapore, and with focus on the asian markets, our mission is to become a respected partner in management and development services in the wind farm industry.
